SUMMARY

GIS Analyst and Urban & Regional Planning graduate with one year of professional experience supporting LGED urban infrastructure and master planning projects. Skilled in ArcMap, QGIS, geodatabase development, spatial analysis, thematic mapping, and geospatial data management. Experienced in transforming spatial and socio-economic datasets into evidence-based planning solutions through GIS analysis, cartographic visualization, technical reporting, and stakeholder collaboration. Passionate about applying geospatial technologies to sustainable infrastructure and development projects.

CORE COMPETENCIES

- GIS Analysis, Spatial Modelling & Geospatial Data Interpretation
- Geodatabase Design, Development & Data Management
- Thematic Mapping, Cartography & Spatial Visualization
- Remote Sensing & Land Use/Land Cover (LULC) Analysis
- Infrastructure Mapping & Urban Spatial Planning
- Spatial Data Quality Assurance & Validation
- Technical Report Writing & GIS-Based Decision Support

PROFESSIONAL EXPERIENCE

GIS Assistant

Planning Design and Research Consultant (PDRC), Dhaka, Bangladesh

Aug 2025 – Jul 2026

Project: Preparation of Urban Master Plan under Improving Urban Governance and Infrastructure Program (IUGIP), LGED

- Developed GIS-supported analytical frameworks for fifteen (15) LGED Pourashava Master Plans by integrating spatial and socio-economic datasets to support evidence-based planning .
- Performed GIS-based spatial analysis of land use, infrastructure, drainage networks, and urban growth patterns using ArcGIS Pro and QGIS to support master planning decisions.
- Designed, developed, and maintained GIS geodatabases, ensuring spatial accuracy, topology consistency, metadata integrity, and standardized geospatial datasets across project deliverables.
- Produced thematic maps, infrastructure maps, land use maps, and spatial visualizations to communicate analytical findings and support planning and engineering decisions.
- Transformed GIS analysis and spatial datasets into technical reports, maps, and planning recommendations for LGED and project stakeholders.
- Collaborated with planners, engineers, and multidisciplinary teams to validate spatial outputs and refine GIS-based planning recommendations.

Project: Upazila Town (Non-Municipal) Master Plan Preparation and Basic Infrastructure Development Project (UTMIDP), LGED

- Designed GIS-based spatial sampling frameworks for socio-economic surveys across three upazilas using spatial distribution and accessibility principles for three (3) upazilas.
- Analyzed spatial and socio-economic datasets to identify infrastructure service gaps and support evidence-based development planning.
- Prepared GIS-derived maps and analytical outputs for project reporting and technical decision-making.

Project: Feasibility Study of “Development of Physical Infrastructure Facilities for the Newly Established Barisal and Ramu Cantonment Boards”, Ministry of Defense.

- Prepared GIS-based base maps and locational analysis to support feasibility assessment of infrastructure development.
- Conducted site context and accessibility analysis to evaluate spatial suitability of proposed facilities.
- Contributed to feasibility study report writing, integrating spatial analysis with planning and development narratives.

Community Engagement and Participatory Planning, PDRC **Jan 2026 – Mar 2026**

- Supervised approximately 270 Focus Group Discussions (FGDs) across 15 municipalities under LGED-supported IUGIP master planning initiatives.
- Managed a field team of 15 enumerators, ensuring data quality, survey coordination, and timely project execution.
- Conducted quality assurance and validation of field data, integrating survey outputs with planning analyses.
- Supported stakeholder engagement, technical documentation, and final report preparation.

FIELD ACTIVITIES

- Participated in field surveys, community consultations, site assessments, and spatial data verification across multiple project locations. Supported collection and validation of socio-economic, infrastructure, environmental, and land-use information. Facilitated interactions with local stakeholders and communities during planning and assessment exercises.

PROFESSIONAL DEVELOPMENT

- Aspire Leaders Program (Aspire Institute, Harvard-founded initiative) - 2026 - Participated in leadership development focused on public problem-solving, collaboration, and social impact.
- “Geospatial Data Analysis and Management - Intermediate Level” - Organized by BIM, National Cyber Security Agency, GoB. Score: **82%**; May 2026. Training areas: GIS Database Development, Spatial Analysis, and Decision Support Systems.

SKILLS

Category	Skills
GIS & Geospatial Technologies	ArcMap, QGIS, Google Earth Engine (GEE), Landsat 4–9 Image Processing, Geodatabase Design & Management, Spatial Database Development, Data Validation, Data Cleaning & Quality Assurance
Cartography & Design	Thematic Mapping, Map Layout Design, AutoCAD, Adobe Illustrator, SketchUp, Lumion
Data Analysis & Reporting	Microsoft Excel, SPSS, Socio-economic Data Analysis, Technical Report Writing, Academic Writing, Literature Review, Policy Briefs, Project Proposals, Technical Documentation
Survey & Field Data Collection	Kobo Toolbox, ArcGIS Field Maps, Survey Form Design, Mobile Data Collection, Data Validation & Quality Control, Data Cleaning & Export
Project Coordination	MS Project, Field Survey Coordination, Stakeholder Coordination
Presentation & Productivity	Microsoft PowerPoint, Canva
Languages	Bengali: Native • English: Professional Working Proficiency

RESEARCH EXPERIENCE & PUBLICATIONS

1. "Exploring the constraints of jute cultivation and analysis of market value: A case study in Bhugroil, Paba Upazila, Rajshahi". International Journal of Scientific Agriculture, Vol. 09, No. 4. March 2024; DOI: <https://doi.org/10.25081/jsa.2025.v9.9504>
 - Conducted field-based data collection, stakeholder interviews, and quantitative analysis.
 - Contributed to research design, data analysis, and academic writing.
2. "Role of Bangladesh Betar in Socio-economic and Cultural Development (April 2026 – June 2026)":
 - Facilitated 3 FGDs and 15 KIIs;
 - Conducted qualitative analysis and prepared technical reports

RESEARCH INTERESTS

- Land Use Change and Environmental Governance
- GIS and Remote Sensing Applications
- Climate Change Adaptation
- Sustainable Land Management

ACADEMIC THESIS

"Urban Change and Thermal Inequity: Land Surface Temp. Analysis and Heat Vulnerability of Marginalized Populations in Rajshahi" (Abstract Shortlisted for book chapters under Springer Disaster Risk Reduction series).

- Applied remote sensing, spatial statistics, and socio-demographic analysis to assess urban heat vulnerability.
- Conducted literature review and secondary data analysis to support research frameworks and planning recommendations & Produced policy-relevant findings to support climate-responsive urban planning.

EDUCATION

Bachelor of Urban & Regional Planning CGPA: 3.53/4.00
Rajshahi University of Engineering & Technology (RUET), Rajshahi,
Bangladesh

Jan 2020 – July 2025
